

Coating data sheet

## SILON

### Description

|              |                     |
|--------------|---------------------|
| Raw material | Non-woven polyester |
| Color        | Anthracite/white    |

### Technical data

|                             |                        |
|-----------------------------|------------------------|
| Thickness min. [mm]         | 1,0                    |
| Thickness max. [mm]         | 2,0                    |
| Hardness +/- 5 [shA]        | -                      |
| Cd*                         | 20                     |
| Minimum pulley dia. [mm]    | backing thickness x Cd |
| Maximum contact temperature | +120 C                 |

### Properties

|                             |        |
|-----------------------------|--------|
| Oil and fat resistance      | low    |
| Coeff. of friction on steel | 0,2    |
| FDA food grade              | no/yes |
